

Bubbles and Thinkers Model and Coloring Page

Model:

1. Bubble: Use clear, round container in two sections. We use “make your own ornament” containers. They are usually available at craft and hobby stores.
2. Thinker: Use beads strung on thin wire or heavy string. We use just four colors to create the DNA impression that will come later.)

Coloring page:

1. Prepare the work with five colored pencils, crayons or markers including one color for the “water” surrounding the bubbles and thinkers and four colors for the thinkers.
2. Students may cut out the thinkers and fill the bubbles, making a kind of story board to show the progression of the Archaean Story.
